December 13, 2017

Ms. Liza Grandia, Ph.D.
550 Oak Avenue
Woodland, California 95695

Dear Ms. Grandia:

The purpose of this correspondence is to respond to your Williams Complaint Form (Form) delivered to Mr. Nick Baral, Director of Facilities on November 17, 2017. Before addressing the particulars of your complaint, know that it is the District's objective to provide safe and sanitary facilities which are academically enriching for our students, staff, and community.

The Form that you submitted included a letter which identified a variety of issues. We will respond to the issues by the following categories:

- Notification of Spraying
- Scheduled Spraying
- Bifenthrin
- Records of Spraying

Notification of Spraying

The District's pest control contractor emailed the M&O Department (Department) and the school site of the scheduled spraying on 10/27/17. According to our investigation, the site administration posted the notification timely and informed the school's staff. In addition, the Department executed a Robo call to the 39 parents/guardians who have requested the personal notification.

The Department canceled the scheduled spraying because we could not determine if adequate notification was given. Respectfully, we are not aware of any requirement to notify parents of the pest control service cancellation.

Scheduled Spraying

The spraying in question was the result of a predetermined schedule developed by the Department and pest control contractor. Currently, the District's serving kitchens and production kitchens are scheduled to be sprayed on a quarterly basis and monthly basis respectively. The District's kitchens are the only spaces on a schedule and all other areas are serviced as needed as determined by site inspections and/or requests by the site administration. A work order from the school site initiates the inspection by the Department and if necessary, a service from the pest control contractor.

Written observations of the inspections are not available; however, limited information is captured on the respective work order. The Department will revamp the process to ensure that site inspections are documented.

Again, the schedule spraying did not take place on October 27 because we could not determine if adequate notification was given. In contrast, the service visits scheduled for the other school sites did take place because appropriate notification was given.

Bifenthrin

Why is the district still using this? If European regulators have doubts about it, perhaps we should too!

Unfortunately, the Department was not aware of the safety issues which you have identified with Bifenthrin. In addition, the Department has not explored any alternative "non-chemical" products for pest control. We will review our inventory with our pest control professionals to identify such options as well as confirm that our current choices of products comply with all federal, state and local regulations. We have learned that IPMs in place at other school districts such as Davis USD, Natomas USD, and Sacramento City USD are utilizing chemicals that contain this product.

Your inquiry has prompted the Department to review alternative pest control products with the pest control contractor. The Department will incorporate the alternative products should any emerge and it is cost effective to do so.

As of the date of your complaint, we acknowledge that the District's IPM failed to display the list of chemicals authorized to be used in the schools. However, we have updated the chemical list and it is available for review on the Department's website. Also, the Department has added the Pesticide Notification Form to its website.

Records of Spraying at Beamer

In your complaint, you are requesting disclosures of all pesticides sprayed over the last four years at Beamer. We have retrieved the archived records and we have included them as an enclosure.

In closing, the Department continues to work closely with the Food Services Department, Site Administration, and pest control professionals to manage the pest infestations throughout the District. The Department is committed not to jeopardize the health of the students, staff, and the community while ensuring the availability of safe and sanitary school facilities.

Thank you for your patience.

Sincerely,

Nick Baral, Director of Facilities
